

Welcome! We are so excited that you're looking to join CAN-TR's riding program. Our riders come from a wide variety of backgrounds, and each has special medical needs. We love watching our clients grow in independence and mobility as they learn to move with the ponies. Many of our riders get to run for the very first time, carried on the back of one of our loving ponies.

Each of our ponies is trained especially for [hippotherapy \(HPOT\)](#) and [therapeutic riding \(TR\)](#), so our riders are in good hands.

In HPOT sessions, clients work with a licensed physical therapist to build strength, increase mobility, and develop longer attention spans. TR sessions are for riders with mild to moderate physical and mental conditions who can ride fairly independently, though students are always accompanied while in the ring.

Cost:

Each HPOT session costs \$150.

Each TR session costs \$50.

Financial Aid:

CAN-TR seeks to make our lessons affordable for all riders who would benefit from the program. We will work with families to raise the money they need to cover their lessons. Some additional financial assistance is available on a sliding scale as funds permit.

Sign up to ride with CAN-TR
